SKILLS

Data & Analytics

- Python
- SQL
- Pandas
- Power BI
- DAX
- Excel Power Query

Business Systems & Digitalization

- SAP
- Financial Systems
- Requirements Analysis
- Process Modeling
- User Acceptance Testing (UAT)
- Process Digitalization

AI & Automation

- LLM Applications
- Scikit-learn
- AI Coding Tools
- REST APIs
- JavaScript

Cloud & DevOps

- Docker
- AWS
- Kubernetes
- Terraform
- Helm
- Linux

PROFILE

M.Sc. student in Management & Digital Technology at TUM with **five years of professional experience** in finance, controlling, business systems, and process digitalization. Experienced in **Python, SQL, Power BI, SAP**, and applied **AI and cloud projects**, with a strong focus on leveraging data, automation, and modern digital technologies to improve business processes.

WORK EXPERIENCE

Mercedes-Benz Group AG

Supply Chain Strategy & Data Analyst Intern / Working Student

10/2025 – 09/2026 | Sindelfingen, Germany

- Cleaned, validated, aggregated, and analyzed international CKD production network data using **Python, Pandas, Jupyter Notebook, and Excel Power Query**, covering **8 countries, 10+ plants, 100+ operational KPIs**, and **10,000+ KPI records per month**.
- Built and maintained a **Power BI dashboard** integrating country, plant, time period, and KPI dimensions, improving management reporting visibility and reducing manual consolidation effort.

Jibangbang Technology Co., Ltd

Financial Controller

09/2022 – 04/2025 | Hangzhou, China

- Led the design and launch of a **Financial Shared Services System**, completing requirements analysis, process modeling, UAT, and production rollout within **1 year**, serving **10,000+ small-business clients**.
- Digitalized budgeting, approval, reimbursement, accounting, reconciliation, and management reporting workflows, reducing **50%+ manual entry and offline processing effort** while improving process transparency and data traceability.
- Used **Excel VBA, Power Query, SQL, and Python** for financial data cleaning, budget forecasting, and business analysis, achieving **95%+ forecasting accuracy** and reducing annual tax expenses by **20%**.

Lvdu Real Estate Group Co., Ltd.

Senior Financial Supervisor

11/2019 – 09/2022 | Hangzhou, China

- Managed budgeting, financial reporting, business analysis, and compliance activities across multiple entities, using **Excel, Power Query, and financial analysis models** for variance analysis, cost structure analysis, and cash flow monitoring.
- Coordinated tax and compliance reporting with headquarters, business units, and external institutions, contributing to **100M+ RMB** in tax deferrals and improving cash flow flexibility.

LANGUAGE SKILLS

Chinese
Mother tongue

English
C1

German
B2

PROJECTS

Enterprise Cloud Cost Optimization Project

- Built a cloud task scheduling and cost optimization prototype using **Python, Pandas, Jupyter Notebook, and DOcplex**, analyzing the relationship between tasks, virtual machine resources, operating costs, and SLA constraints.
- Designed a **rolling horizon scheduling** approach to compare different scheduling strategies based on **VM usage cost, SLA violations, and solver runtime**, exploring ways to reduce cloud operating costs while maintaining service quality.

AI Infrastructure Startup Analysis

Schwarz Project Study

- Used **Python, Pandas, Jupyter Notebook, and Excel** to screen, clean, classify, and aggregate AI infrastructure, cloud, DevOps, and MLOps startup data, identifying high-potential companies for Schwarz to invest in, partner with, or replicate internally.
- Built a **Power BI dashboard** summarizing company profiles, technology domains, funding stages, use cases, and strategic fit, supporting AI infrastructure startup portfolio sourcing and decision discussions.

AI-based Meeting Room Search & Booking System

- Developed an **LLM-based** meeting room search, recommendation, and booking prototype, enabling users to describe meeting needs in natural language and receive room suggestions based on capacity, equipment, location, time, and usage scenario.
- Built the frontend interaction and backend retrieval logic using **Vue.js, JavaScript, and Python**, integrating query interpretation, room attribute matching, and booking flow into a working application prototype.

Chicago Crime Data Prediction Project

- Analyzed the **Chicago Crime Dataset** using **Python, Pandas, NumPy, Scikit-learn, and Jupyter Notebook**, performing data cleaning, time and location feature extraction, categorical encoding, and feature reduction to identify crime hotspots by area and time period.
- Compared **SVM, KNN, Random Forest, and Logistic Regression** classifiers using cross-validation, confusion matrix, precision, recall, and F1-score, achieving **95%+ prediction accuracy**.

EDUCATION

Master's Degree in Management and Digital Technology

Technische Universität München

04/2025 – Present | Heilbronn, Germany

Bachelor's Degree in Accounting

Hangzhou Dianzi University

09/2016 – 06/2020 | Hangzhou, China

CERTIFICATES

- Certified Management Accountant (CMA), IMA
- Intermediate Accounting Professional Qualification, China
